

1. Name of the Project: Building Climate Resilience of Watersheds in Mountain Eco-Regions

Objective: To build climate change resilience of mountain communities of Nepal

Expected Outcome: Selected communities significantly vulnerable to climate change will have access to more reliable water resources.

Area of Coverage: Sub-watersheds of the Lower West Seti and Budhi Ganga watersheds in the West Seti Sub-basin of the Karnali River basin covering 6 districts (Accham, Bajhang, Baitadi, Bajura, Dadeldhura, and Doti)
